Foot traffic and bikes welcome. No motorized vehicles.

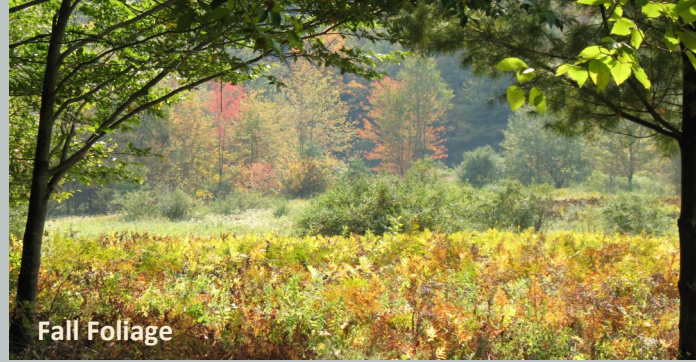

Carry in and carry out trash and waste, including pet waste.

Dogs must be leashed or under voice control of the owner. Please pick up after your dogs.

Stick to established trails. No cutting of new trails.

Hunting is permitted within legal seasons.

Tours, events, and groups of 10+ by permission only.

Fall Foliage

Protected Forever

The DuMont property was donated to Stowe Land Trust in 2003 in honor of Paul Joseph and Alma Clark, who had owned the meadow since the 1960s. The donation of this property protects a special piece of land sandwiched between Mt. Mansfield State Forest and the Little River.

Stowe Land Trust is a local, member-supported, non-profit 501(c)(3) organization dedicated to the conservation of scenic, recreational, and productive farm and forest lands for the benefit of the greater Stowe community.

Volunteers have put in hundreds of hours of work to help care for **Stowe Land Trust** properties. At DuMont Meadow, volunteers have been instrumental in helping SLT control invasive plants in the meadow and restore a riparian buffer along the Little River. Join them today! stowelandtrust.org

Owned and Managed by
Stowe Land Trust

Trail Map & Guide

Exploring DuMont Meadow

① **Alex's Trail** Built in 2008, this gentle 1.5 mile loop is a great beginner mountain bike trail and easy walk. The trail winds through a dense forest before making a loop around the picturesque open meadow.

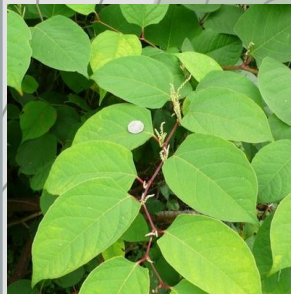

② **Boundary Lines** Have you ever noticed red or orange paint on trees in the forest? You were likely looking at a property boundary. Surveyors mark boundary lines in the woods by cutting a blaze into a tree and then painting the mark. Can you find the spot where Alex's Trail crosses a property boundary line?

③ **Little River** DuMont Meadow provides access to the river for fun summer activities like fishing and swimming.

④ **Invasive Species** The open meadow at DuMont offers habitat for butterflies, birds, and bees. But this habitat is damaged by non-native invasive species that produce nutritionally poor berries and out compete all other vegetation.

With the help of many volunteers, SLT has worked hard to improve the habitat at DuMont Meadow by removing and controlling the spread of invasive species. Keep an eye out for invasive plants like Japanese knotweed and non-native honeysuckle as you explore.

Japanese knotweed

Non-native honeysuckle
